

LEPTOMEROCORIS SIMPLEX.

Leptomerocoris simplex, *Walk. Cat. Hem. Het. B. M.* vi. p. 145, n. 107 (1873).

Described from Ceylon.

LEPTOMEROCORIS ALBIVIRIDESCENS.

Leptomerocoris albiviridescens, *Motsch. Bull. Mosc.* xxxvi. (3) p. 85 (1866).

Described from Ceylon (Patannas).

LEPTOMEROCORIS (?) PISTACINUS.

Leptomerocoris (?) pistacinus, *Motsch. Bull. Mosc.* xxxvi. (3) p. 85 (1863).

Described from Ceylon (Patannas).

LEPTOMEROCORIS (?) ALBOFASCIATUS.

Leptomerocoris (?) albofasciatus, *Motsch. Bull. Mosc.* xxxvi. (3) p. 86 (1863).

Described from Ceylon (Patannas).

*†LEPTOMEROCORIS PUNCTATUS, sp. n.

Long. corp. 5 millim.

Testaceous; pronotum more yellow; a band of 3 large, nearly connected black spots runs from behind each eye to the lateral angles of the pronotum, and there are 4 more conspicuous black spots arranged in a semicircle in front of the pronotum. Scutellum and corium longitudinally striped with black and testaceous: towards the extremity of the corium is a red spot on the costa bordered with yellow, and with a black spot before and behind. Membrane with the nervure black and a short black streak beyond it.

Exact locality not stated.

LIOCORIS GLABRATUS.

Liocoris glabratus, *Motsch. Bull. Mosc.* xxxvi. (3) p. 87, pl. ii. f. 20 (1863).

Described from Ceylon (Nura Ellia and Patannas).

*MONALOCORIS BIPUNCTIPENNIS.

Monalocoris bipunctipennis, *Walk. Cat. Hem. Het. B. M.* vi. p. 159, n. 2 (1873).

Described from Ceylon.
