## INTRODUÇÃO

Por ocasião da retirada do apoio financeiro dado ao Catálogo Geral de Hemíptera pelo Smith College, Northampton, Massachussets, foram feitos esforços para obtenção de verbas através da UNESCO e outras fontes, a fim de continuar a publicação do mesmo. Tais esforços foram, todavia, infrutíferos. Como o Professor Z. P. Metcalf tivesse já preparado os manuscritos para vários volumes do Catálogo, trabalhou intensamente para obter fundos suficientes para tê-los publicados.

Felizmente, ainda pôde conseguir com a "National Science Foundation U.S.A.", dinheiro para publicação desses volumes. Com a lamentada morte do Professor Metcalf, os recursos obtidos tornaram-se insuficientes tendo, então, o Professor Clyde F. Smith do "North Carolina State College", assumido a dire-

ção desses trabalhos com recursos cedidos por sua instituição. A posição financeira futura do Catálogo é ainda duvidosa. Neste ínterim, preparei o Catálogo dos Mirídeos do Mundo e decidi, a conselho do Dr. W. E. China, dar na contracapa o título equivalente de Catálogo Geral de Hemíptera, fascículo sete. Na introdução da parte I, essa ação foi sugerida e agora resolvi adotar este procedimento, de forma que este catálogo é realmente parte do Catálogo Geral. Se em qualquer época futura fôr desejável atualizar e imprimir o Catálogo dos Mirídeos do Mundo no formato padrão do Catálogo Geral de Hemíptera, publicado até o presente, terei muita satisfação não só em permiti-lo como, também, incentivá-lo.

## INTRODUCTION

On the cessation of the financing of the General Catalogue of Hemiptera by Smith College Northampton, Massachusetts, attempts were made to obtain funds with which to carry on the Catalogue from UNESCO and other sources without success. As Prof. Z. P. Metcalf already had the manuscripts completed for several volumes of the Catalogue he made energetic attempts to find the money to have them published. Eventually he was successful in obtaining funds from the National Science Foundation, USA. Following the much lamented of Prof Metcalf the funds available from the National Science Foundation were found to be insufficient to complete the publication of Prof. Metcalf's manuscripts which was being undertaken by Prof. Clyde F. Smith of the North Carolina State College. It was found

necessary to supplement the Foundations contributions with College funds. The future financial position of the Catalogue is still in doubt. In the meantime I have prepared the present Catalogue of World Miridae and have decided to give on the inside of the cover the equivalent title of the General Catalogue of Hemiptera. In the introduction of Part I this course was suggested and I have now decided to adopt this procedure so that the present catalogue is in effect part of the General Catalogue of Hemiptera. If at some future date it is desirable to bring the present work up to date and to reprint it in a uniform format with the General Catalogue so far published I shall be most happy to give permission.
