

***Pamercoris anthocoroides* Uhl.**

Near Denver (B. H. Smith—see Uhler, 5).

***Monalocoris filicis* L.**

Swept from a small fern which grows in damp places among the rocks high up in the mountains near Beaver Brook, adjoining Clear Creek Canon, August 6th (Uhler, 5).

***Eccritotarsus scabrosus* Uhler n. sp.**

"Compact, thick and short, somewhat resembling *E. vestitus* Dist., a little pubescent, the general color piceous-brown, with red head and legs, and nearly all of the upper surface roughly, and coarsely punctate. Head tumidly convex, with a callous ridge against the inner border of the eyes, and this continued along the border of the occiput; surface somewhat coarsely punctate, the front indented in the middle and grooved each side, a little obscured with brown; tylus a little more prominent than the front, placed almost vertical; the rostrum rufous, a little tinged with piceous; antennae blackish, short, stout, the basal joint shorter than the head, contracted at base, the second longest, growing thicker towards the tip, shorter than the pronotum, the third much more slender, about one-half as long as the second, the fourth much shorter. Pronotum strongly convex, a little longer than wide, steeply sloping towards the head; the anterior lobe abruptly contracted, separated by a transverse and curved series of indented points; surface tinged with rufous, coarsely, roughly punctate; lateral margins sinuated and steeply curved down; the posterior margin a little curved, feebly sinuated, bent down; pleural flaps very coarsely punctate. Legs stout, rufous, covered with pale pubescence. Scutellum small, tumid at tip, punctate basally. Hemelytra broad, thick, coarsely and roughly punctate, the cuneus long, depressed, curved on both sides, the membrane fuliginous, with a pale arc on the middle, the areoles rough and of thick texture. Sternum and venter somewhat rufous, the latter obsolete punctate, highly polished, minutely pubescent.

Length to end of abdomen 2.5 mm. Width of pronotum 1.25 mm. Described from one specimen, a male, from Colorado "

Estes Park, July 10th (Gillette).

***Pycnoderes insignis* Reut.**

Steamboat Springs, July 26th (Gillette).

***Ilnacora chloris* Uhl.**

On the flowers of a slender pale composite, growing in Manitou Park, August 14th. Also near Colorado Springs, in the low grounds near Fountain Creek (Uhler, 5). West Cliff, Custer County, sweeping herbage, July 25th (Cockerell, 10).

Estes Park, July 10th; Dolores, June 18th; Steamboat Springs, July 26th (Gillette).

***Ilnacora divisa* Reut.**

Steamboat Springs, July 14th and 26th (Gillette and Baker).

***Ilnacora stallii* Reut.**

Steamboat Springs, July 16th (Baker).
